Assingment 1 Feedback: Xiang Li

Question 1

Excellent data manipulation, very good plots and interpretation!

Question 2

- In the first if, the stop message will appear if `is.integer(num)`, whereas we want the stop message if the input is not an integer. There are multiple ways to check that, for example see the following difference:

```
5.6%%1 == 0
```

```
## [1] FALSE
```

```
5%%1 == 0
```

```
## [1] TRUE
```

- For the 2 bottles line, it should be "... 1 bottle..", rather than "... 1 bottles..".

Overall

- Very good structure of the pdf file.
- The title of the document should be an actual title, not a file name with underscores.
- Very good job overall, keep it up!
